

## **Music Technology Assignment #1: Set Up a Basic Loop Project**

1. Click the Garageband icon
2. Open an empty project
3. Select software instrument
4. Press command K to hide the musical typing window
5. Select acoustic guitar from the library on the left (under guitar)
6. Click the plus sign (+) in the upper left corner
7. Add another software instrument
8. Select Yamaha grand piano from the library (under piano)
9. Add a drummer track using the + sign
10. Click the scissors (editor) in the upper left corner to close the bottom window
11. Delete both yellow regions (select and then press the delete key)
12. Click the library button in the upper left corner to close the library
13. Use the horizontal zoom tool in the upper right to zoom out (pull left)
14. Go to top right by measure numbers and pull slider until it reads 13 1 1 1
15. Go to File, save as, and save your project as your first name, your partner's first name, and then type the words "basic loop project."  
Example: Matt and Kerri's basic loop project
16. Save under "iCloud Drive" under the Garageband folder

Tip: If you get lost, click the question mark icon on the top left (this displays a help window that explains what each function does)
